

AccuSeal®

AccuSeal Exhaust Clamp

Assembled, serviceable joint for use on all slotted rigid pipe.

The simple, effective way to connect exhaust system components. Pipes, mufflers and converters. Unique seal and high clamp loads are provided without permanent distortion to exhaust members. Exhaust connections are serviceable and easy to disassemble.

Available in:

- Aluminized steel
- Aluminized 409 stainless steel
- Polished 430 stainless steel
- 409 stainless steel
- 304 stainless steel
- 430 stainless steel

AccuSeal, with Torca designed slots, provides optimal seal and joint retention performance.

- Hexavalent chrome free
- Available in diameters from 44.5 mm (1 3/4 ") through 177.8 mm (7").
- A serviceable joint. Unitized construction reduces part number complexity.
- Efficient use of materials reduces weight and assembly costs.
- Unique fastening system stretches the band using its tensile strength permitting the use of thinner gauge, corrosive resistant materials.
- The exclusive reaction block provides a full 360 equal distribution of stretching forces, prohibiting pipe distortion while completing a seal around the joined exhaust components.

Unitized assembly. NO LOOSE hardware. Slides into place, installs easily and reliably.

Pre-attached to outside tube for part-in-assembly shipment to vehicle assembly plant.

The reaction block transfers bolt torque into clamp strength and an assured seal.
