

Torca Coupler

Exhaust Coupler

*For joining high performance
exhaust components*

New from Torca Products – An effective alternative for joining exhaust system components without the need for pipe sizing or slotting. Provides a serviceable joint – no permanent distortion of exhaust members.

Available in:

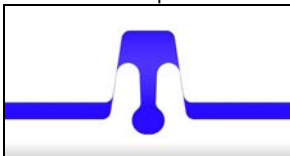

- Aluminized steel
- 409 stainless steel
- 304 stainless steel

Inner sleeve provides tight seal with patented dual tongue-&-groove feature

- Hexavalent chrome free
- Available in diameters from 38.0 mm (1 ½ ") through 76.2 mm (3").
- Overall length 85.0 mm.
- Does not require pipe overlap.
- Eliminates the need for sizing and slotting of pipe members.
- 15mm fastener drive
- Allows assembly & service without longitudinal movement of pipe members.

Unique tongue and groove sleeve allows for a large pipe sizing tolerance while still maintaining optimal joint air leak and separation resistance performance.

Unitized assembly. NO LOOSE HARDWARE. Slides into place, installs easily and reliably. The reaction block transfers bolt torque into clamp strength and an assured seal.
